SUMMARY OF QUALIFICATIONS

- Computer science graduate from the University of Georgia with experience developing software using Next.js, Spring Boot, PostgreSQL, MongoDB and Firebase. Eager to contribute as a software engineer in full-stack, backend, or frontend roles and grow through real-world development.

EDUCATION

University of Georgia, Franklin College of Arts and Sciences

Athens, GA

Bachelor of Science, Computer Science, Magna Cum Laude

August 2022 - May 2025

Overall GPA: 3.77

Relevant Courses: Algorithms, Data Structures, Web Programming, Software Engineering, Mobile Software Development, Cybersecurity, Computer Networks, Computer Architecture Organization

PROJECTS

jbtrckr, *Personal Project*

June 2025 - July 2025

- Developed a full-stack job tracking app using Next.js, Spring Boot (Java), and PostgreSQL.
- Designed and implemented a RESTful API that allows per-user CRUD operations for entries.
- Implemented JWT-based authentication and authorization via Spring Security allowing account creation and data isolation.
- Stored job application and user data in a PostgreSQL database running in a Docker container

Remindeer, *Web Programming*

March 2024 - April 2024

- Worked in a team of 4 to develop a full stack application using MongoDB, Express.js, Node.js, and Next.js.
- Debugged and helped implement a RESTful API that enabled CRUD operations.
- Implemented JWT-based authentication and authorization to block unauthorized users from performing CRUD operations
- Authorized server-side routes using a middleware function that verified a JWT

Cost Settler, *Mobile Software Development*

November 2024 - December 2024

- Collaborated on an Android app using Java and Firebase enabling a shared shopping list cost splitting/tracking
- Implemented the ability to move items from a shopping list to user specific shopping carts, make and edit purchases to correct any incorrect information.
- Added the functionality of settling costs in order for users to properly pay their share of the total cost.
- Used Firebase to store any necessary data and implement authentication.

State Capitals Quiz, *Mobile Software Development*

October 2024 - November 2024

- Contributed to a six question Android quiz app using Java and SQLite
- Stored quiz information, read from a .csv file, into a table in order to randomly select states and answers for a quiz question.
- Recorded data for every attempt (score and when a quiz is started) in another table.
- Implemented the functionality of viewing quiz attempt history.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, Python, HTML, CSS, TypeScript, SQL, C, C++

Frameworks/Libraries: React, Next.js, Spring Boot, Node.js, Express.js, React Native, JavaFX

Tools: Git, Github, VSCode, Android Studio, Postman, Unix, IntelliJ, Figma, Docker, Wireshark, Jupyter Notebook

Databases: PostgreSQL, MongoDB, Firebase, SQLite

WORK EXPERIENCE

TheCoderSchool

Suwanee, GA

Code Coach

July 2025 - Present

- Coach students in coding across various languages such as Python, HTML/CSS and Javascript
- Tailor lessons to each individual student to match skills, interests and goals.
- Encourage problem solving through project-based learning.

Kumon Institute of Education

Suwanee, GA

Tutor

July 2019 - March 2020

- Tutored students from preschool to middle school in math and language arts
- Reinforced foundational skills through providing graded feedback.
